

SEDAR 80 Caribbean Queen Triggerfish

This assessment will produce 3 sets of research recommendations. Only two have been produced so far.

SEDAR 80 – Puerto Rico

- Continue examinations of growth, in particular focus on collection of larger individuals for better characterizing the L_{∞} parameter.
- Support enhanced stock demographic studies and in particular research focused on quantifying connectivity patterns between island platforms.
- Expand programs for acquisition of life history samples across a suite of key species harvested by commercial and recreational fishers.
- Continue the SEAMAP video surveys. Expand the survey spatially and temporally (e.g., beyond the 30m depth range, and across seasons).
- Consider exploration of historical fishery independent data in near shore mangrove habitats.
- Consider exploration of oceanographic data time series for inclusion of environmental indices.
- Consider other data limited modeling applications.
- Consider a management strategy evaluation (MSE) to identify data needs and ensure management advice is robust to key uncertainties.

SEDAR 80 – St. Thomas and St. John

- Continue examinations of growth, in particular focus on collection of larger individuals for better characterizing the L_{∞} parameter.
- Support enhanced stock demographic studies and in particular research focused on quantifying connectivity patterns between island platforms.
- Expand programs for acquisition of life history samples across a suite of key species harvested by commercial and recreational fishers.
- Continue the SEAMAP video surveys. Expand the survey spatially and temporally (e.g., beyond the 30m depth range, and across seasons).
- Re-initiate annual sampling in the NCRMP Visual Census Survey program.
- Consider exploration of historical fishery independent data collected by NCRMP in near shore mangrove habitats.
- Consider exploration of oceanographic data time series for inclusion of environmental indices.
- Consider other data limited modeling applications.
- Consider a management strategy evaluation (MSE) to identify data needs and ensure management advice is robust to key uncertainties.
- Identify data needs and ensure management advice is robust to key uncertainties.
